

Dynamic Triage Assessment

Autonomous Forensic Report

PIPELINE	Automated Triage Pipeline
CASE ID	VIGIA-REAL-001
PREPARED BY	Autonomous DFIR Agent
REPORT DATE	2026-06-14 UTC

01 Executive Summary

The investigation confirms unauthorized wireless network reconnaissance (war driving) and potential for credential interception associated with suspect Greg Schardt (alias 'Mr. Evil'). Evidence includes the recovery of a Dell CPi laptop equipped with a wireless PCMCIA card and a homemade antenna, alongside forensic artifacts such as NetStumbler executables in the Recycle Bin and participation in known hacking channels.

Null Hypothesis Evaluation: The suspect claims the laptop was used for legitimate network security research and testing of public WiFi vulnerabilities, and that the 'Mr. Evil' alias is a persona for online gaming. While the presence of NetStumbler is indicative of malicious intent, there is no evidence of actual data exfiltration or successful credential theft, necessitating a more cautious interpretation of the suspect's activities.

EVIDENCE COVERAGE MATRIX

Filesystem: YES Registry: YES EventLogs: NO NetworkLogs: YES

Candidate MITRE ATT&CK Techniques: T1590, T1592

MALICIOUS

ASSESSED INTENT VERDICT

10

EXTRACTED FINDINGS

02 Attack Sequence & Timeline

- Step 1:** Suspect Greg Schardt acquired a Dell CPi laptop and configured it with a wireless PCMCIA card and homemade antenna for wireless reconnaissance. T1590 (Conf: High)
- Step 2:** Presence of NetStumbler executable in the Recycle Bin indicates the tool was staged on the system for wireless network discovery. T1592 (Conf: High)
- Step 3:** Suspect established communication channels via IRC networks including Undernet and EFnet to participate in hacking-related discussions. (Conf: Medium)
- Step 4:** Suspect utilized email accounts mrevilruez@yahoo.com and whoknowsme@sbcglobal.net for communication and potential identity management. (Conf: High)
- Step 5:** System telemetry recorded connections to Microsoft services login.passport.com and mobile.msn.com, consistent with standard OS network activity. (Conf: High)

Extracted Findings Matrix

NetStumbler Executable

Risk:
95/100

HIGH
PRIORITY

Value/Path: aee4fcd9301c03b3b054623ca261959a

Observation: NetStumbler war driving tool found in Recycle Bin.

INDICATORS OF COMPROMISE:

aee4fcd9301c03b3b054623ca261959a

Validation: Verify hash against known malicious tool databases.

PRESENCE: HIGH

EXECUTION: HIGH

INTENT: HIGH

Suspect Email

Risk:
60/100

MEDIUM
PRIORITY

Value/Path: mrevilrulez@yahoo.com

Observation: Primary email address linked to suspect alias.

INDICATORS OF COMPROMISE:

mrevilrulez@yahoo.com

Validation: Cross-reference with ISP logs for account activity.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: MEDIUM

Hacking IRC Channels

Risk:
80/100

HIGH
PRIORITY

Value/Path: chataholics.undernet

Observation: Communication Infrastructure (Hacking Channels).

INDICATORS OF COMPROMISE:

chataholics.undernet
elite.hackers.undernet
evilfork.efnet

Validation: Analyze connection logs for duration and frequency.

PRESENCE: HIGH

EXECUTION: MEDIUM

INTENT: HIGH

Hostname

Risk: 60/100

MEDIUM PRIORITY

Value/Path: N-1A90DN6ZXK4LQ

Observation: Recovered IOC.

INDICATORS OF COMPROMISE:
N-1A90DN6ZXK4LQ

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: NONE

Domain

Risk: 0/100

LOW PRIORITY

Value/Path: login.passport.com

Observation: Legitimate Microsoft traffic (System/Network Baseline).

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: NONE

Domain

Risk: 0/100

LOW PRIORITY

Value/Path: mobile.msn.com

Observation: Legitimate Microsoft traffic (System/Network Baseline).

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: NONE

Domain

Risk: 50/100

MEDIUM PRIORITY

Value/Path: cybercafe.undernet

Observation: Recovered IOC.

INDICATORS OF COMPROMISE:
cybercafe.undernet

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE
