

Dynamic Triage Assessment

Autonomous Forensic Report

PIPELINE	Automated Triage Pipeline
CASE ID	VIGIA-REAL-002
PREPARED BY	Autonomous DFIR Agent
REPORT DATE	2026-06-14 UTC

01 Executive Summary

The subject, a technology development manager, engaged in unauthorized exfiltration of confidential company data. Evidence includes communication with an external conspirator (spy.conspirator@nist.gov), use of personal email (iaman.informant.personal@gmail.com) for data transfer, and the installation of anti-forensic tools (CCleaner, Eraser) to conceal activity. The subject also performed unauthorized access to secured network drives and exhibited anomalous logon patterns.

Null Hypothesis Evaluation: The subject was attempting to bypass DLP controls for personal convenience rather than malicious exfiltration, and the anti-forensic tools were used to hide personal browsing history rather than corporate data destruction.

EVIDENCE COVERAGE MATRIX

Filesystem: YES

Registry: NO

EventLogs: YES

NetworkLogs: YES

Candidate MITRE ATT&CK Techniques: T1048 (Exfiltration Over Alternative Protocol), T1078 (Valid Accounts), T1485 (Data Destruction), T1567.002 (Exfiltration Over Web Service)

MALICIOUS

ASSESSED INTENT VERDICT

6

EXTRACTED FINDINGS

02 Attack Sequence & Timeline

- Step 1:** Presence of corporate email account iaman.informant@nist.gov used for initial contact with external conspirator spy.conspirator@nist.gov. T1078 (Conf: High)
- Step 2:** Subject accessed secured network drive at 10.11.11.129 outside permitted hours to collect confidential data. T1078 (Conf: High)
- Step 3:** Subject exfiltrated collected data via personal Gmail account iaman.informant.personal@gmail.com. T1567.002 (Conf: High)
- Step 4:** Subject utilized CCleaner and Eraser to perform data destruction and conceal exfiltration activity. T1485 (Conf: High)
- Step 5:** Presence of IP address 10.11.11.128 associated with network activity. (Conf: High)

Extracted Findings Matrix

External Conspirator Email

Risk: 90/100HIGH PRIORITY

Value/Path: spy.conspirator@nist.gov

Observation: External email address communicating with the subject regarding confidential data.

INDICATORS OF COMPROMISE:
spy.conspirator@nist.gov

Validation: Cross-reference with HR records and external threat intelligence.

PRESENCE: HIGHEXECUTION: HIGHINTENT: HIGH

Personal Exfiltration Account

Risk: 95/100HIGH PRIORITY

Value/Path: iaman.informant.personal@gmail.com

Observation: Personal Gmail account used to exfiltrate corporate data.

INDICATORS OF COMPROMISE:
iaman.informant.personal@gmail.com

Validation: Audit DLP logs for attachments sent from this account.

PRESENCE: HIGHEXECUTION: HIGHINTENT: HIGH

Anti-Forensic Tools

Risk: 85/100HIGH PRIORITY

Value/Path: CCleaner, Eraser

Observation: Installation of tools used to wipe evidence after exfiltration.

Validation: Review installation logs and file system timestamps.

PRESENCE: HIGHEXECUTION: HIGHINTENT: HIGH

Anomalous Network Access

Risk: 75/100MEDIUM PRIORITY

Value/Path: 10.11.11.129

Observation: Access to secured network drive followed by immediate disconnection.

INDICATORS OF COMPROMISE:
10.11.11.129

Validation: Review firewall and VPN logs for session duration.

PRESENCE: HIGHEXECUTION: MEDIUMINTENT: HIGH

Observed Email

Risk:
40/100

MEDIUM
PRIORITY

Value/Path: iaman.informant@nist.gov

Observation: Recovered IOC.

INDICATORS OF COMPROMISE:
iaman.informant@nist.gov

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: NONE

IP Address

Risk:
50/100

MEDIUM
PRIORITY

Value/Path: 10.11.11.128

Observation: Recovered IOC.

INDICATORS OF COMPROMISE:
10.11.11.128

Validation: Corroborate telemetry.

PRESENCE: HIGH

EXECUTION: NONE

INTENT: NONE

This report was produced automatically via an LLM-driven forensic pipeline. Findings are based strictly on evidence present in the provided target at the time of analysis.
