01 Executive Summary

Investigation confirms industrial espionage involving Donald Norby, who exfiltrated confidential SwiftLogic Inc. documents. Malware on the target device facilitated periodic PDF exfiltration to external IP 50.56.29.109. Negotiation of intellectual property sale was identified via SMS/email with partner Mr. E. Yob. Suspect is deceased.

Null Hypothesis Evaluation: The suspect was a legitimate employee using the device for authorized data transfer, and the external IP was a corporate cloud storage endpoint. This is refuted by the presence of hardcoded malware references to the IP and the context of unauthorized negotiation of intellectual property sale with Mr. E. Yob.
